

IN THE CLAIMS

Please substitute claims 1-8 with the following:

1. (Currently Amended) An organic electroluminescence display in which plural rows of scanning lines and plural columns of signal lines are arranged, and pixels are arranged at portions where said scanning lines intersect said signal lines, said pixels having an organic electroluminescence layer inclusive of an organic light emitting layer held between first pixel electrodes constituted by said scanning lines and second pixel electrodes connected to said signal lines, wherein said second pixel electrodes are overlapped on said scanning lines in a direction in which said scanning lines are extending and each of said second pixel electrodes is ~~are~~-arranged over at least two neighboring signal lines.

2. (Canceled without prejudice)

3. (Currently Amended) An organic electroluminescence display according to claim 1, wherein each of said second pixel electrodes is ~~are~~-arranged over two neighboring scanning lines among said scanning lines.

4. (Currently Amended) An organic electroluminescence display according to claim 1, wherein a portion of said second pixel electrodes is ~~are~~-arranged over the at least two neighboring scanning lines among said scanning lines.

5. (Original) An organic electroluminescence display according to claim 1, wherein said signal lines are divided into plural lines in a direction in which they extend.

6. (Currently Amended) An organic electroluminescence display according to claim 1, wherein each of said second pixel electrodes is ~~are~~ connected to one of said at least two neighboring signal lines.

7. (Original) An organic electroluminescence display according to claim 3, wherein said signal lines are divided into plural lines in a direction in which they extend.

8. (Original) An organic electroluminescence display according to claim 4, wherein said signal lines are divided into plural lines in a direction in which they extend.
